Big Sir's Commentary :

The committee chairmen of Branch 146 are the backbone of our organization. Some are not very visible to the group at large, like **Dale Haukland**, Attendance and Wine Tasting chair. Dale never reveals the number of calls he receives before every luncheon, yet he provides that information to the Board and to **Stan Jackson**. Stan has been setting the menu and making certain that we are not too far under or over for several years. He has been the lead man in negotiating with **Jerry Blake**. We see most of the chairs at each executive meeting, save perhaps that intrepid group of ham radio guys who first organized the branch. These are the guys who responded so rapidly in the last few major earthquakes. Our chairs are really a committed group. Take **Al Zeppa**, for instance, chair of our Bowling activities who was ill, unable to bowl, yet was still in there, organizing events and making certain things progressed smoothly. I am happy to report that Al has returned to the alley, in pursuit of that illusive 300. Green thumb, **Chuck Bobinecz**, chair of the Gardening group, pursued that interest at UC Davis and is now a certified Master Gardener. He had the group to his home recently and our members were both awed and inspired by a garden that Sunset Magazine would applaud.

I have mentioned just a few of the leaders whose efforts make our branch so interesting and so successful. The next time you're at one of our events give a special thanks to the chairman.

Know Your SIR

Bob Schroder

I was born in San Francisco on July 22, 1928 and my parents immediately moved to Walnut Creek. We lived in a small farm house on an eight acre walnut ranch, now the site of Las Lomas High School RFD#1 box2). My father, commuted to San Francisco until 1930 when he started his own insurance

agency in the back of a grocery store in Walnut Creek. I attended Walnut Creek Grammar School and graduated from Acalanes High School in 1946. I received my degree in economics from Fresno State College in 1950. After attending insurance school in Hartford Connecticut, I went to work with my father. My primary responsibility was to survey farms, ranches and orchards for insurance purposes. My territory was from Moraga to Brentwood and all areas in between. I retired from the agency after 50 years. My son Rob entered the business after working for the Home Insurance Company in Chicago as an underwriter.

In 1962, I was elected to the City Council and was Mayor of Walnut Creek for three terms. In 1976 I was elected to the Board of Supervisors of Contra Costa County and served sixteen years, voluntarily retiring in 1993. I represented other than Walnut Creek, Orinda, Moraga, Lafayette, Alamo, Danville, San Ramon, Diablo and Black Hawk. I am married to Frances (Stanley) and we just celebrated our 50th wedding anniversary. We have three married children and eight grandchildren, all living in the area.

Frances and I both enjoy golf, tennis, skiing and just about any other outdoor activity.

I have been fortunate to have served as chairman of the Metropolitan Transportation Commission and the Central Contra Costa Transportation Authority and as Trustee of John Muir Medical Center among other volunteer agencies. However, the highlight of my volunteer career was the position of Volunteer Fireman for 20 years in the Central Fire District, Walnut Creek.

Vision-Correcting Laser Surgery

Laser eye surgery can diminish night vision. Two to five years after undergoing laser-corrective surgery called *photo refractive keratectomy* (PRK), 56% of patients failed a contrast sensitivity test that measured the ability to see clearly at night.

Researchers theorize that laser surgery damages the *stroma*, a corneal layer that is responsible for night vision. It appears that the damage is permanent. LASIC, a vision-correcting procedure similar to PRK, could cause similar problems.

Cook Your Carrots

Cooked, pureed carrots have 34 percent more phenolics— a type of antibiotic— than raw carrots. The heating softens the carrots, allowing these antioxidants to be released from cell walls. These antioxidants (also found in chocolate and red wine) help prevent cell damage from the body's normal metabolism.
