Artificial Intelligence (AI)
Frank Terzuoli

The SIR146 Artificial Intelligence (AI) Discussion group meets on the first Monday of each month at 2 PM at the Walnut Creek Library (Las Trampas Room). The attendees are interested in learning more about AI and how it will impact existing norms.   The group chair will distribute recommended articles to read.

Some of these articles may be utilized for meeting discussion.   Reading these articles also will educate each meeting attendee with the objective to increase meeting discussion significance. The below detailed topics may be part of these meetings.

- **AI Apps and User Experience**
  Our group is fascinated by the rapid evolution of AI-powered apps and how they can enhance our daily experiences.

- **AI's Impact on Education**
  The rise of AI is dramatically reshaping numerous industries, requiring workers to reinvent themselves.

- **Careers and Healthcare**
  We also explore AI's potential to revolutionize healthcare through applications like computer-aided diagnosis, drug discovery, and personalized medicine.

- **AI's Societal Impact - Defense, Politics and Misinformation**
  No discussion of AI would be complete without examining its impact on sectors like national defense and politics.

- **Governing AI's Use of Data**
  Perhaps our most passionate debates center around governing the data used to train AI models.
