

Gardening

Ken Studer

You are invited to join the *Gardening Group*.

We meet monthly on the third Monday of each month.

Potential Discussion topics:

- Diagnosing plant problems
- Pruning techniques
- Irrigation
- Vegetables
- Soil science

We plan to meet at different homes each month to observe different gardens with their concepts, see what is growing vigorously and what is suffering, meeting on a patio and discussing a planned garden topic as well. I envision this activity as growing 10 to 12 participants.

This is a Co-Ed activity. E.g., SIRs can bring their wives or significant others. Also, both SIR men and their wives can attend individually.
